

FLU VACCINATION FOR OUR OVER AGED 65 PATIENTS

We have bought the vaccine for our patients and have it in stock. Please contact us to make an appointment to have your flu vaccine as soon as possible or use our walk-in service. See our website for more details.

Each year we buy in flu vaccine for our patients so we can vaccinate them against the flu virus. We are committed to keeping our patients safe and plan well ahead of the flu season to make sure we will have enough vaccine available. We are aware that some patients choose to have their vaccination whilst out shopping and call at community pharmacies to have this, which is obviously their choice. However, it is also important to support your GP Practice and have the vaccine at the surgery so that the vaccine we have bought in isn't wasted and so we can appropriately document the vaccination details in your medical record.
